CFOP · the easy way

yellow on top · white cross on the bottom · green in front

sexy `R U R' U'` **sledgehammer** `R' F R F'` **fat f** `f (front two layers)` **fat sexy** `r U R' U'`

1 · Cross

White cross on the bottom, edges matching their centres. Basic method; advanced cross planning comes later.

1. **Daisy.** Bring the 4 white edges up around the yellow centre, white facing up. Turn U out of the way before moving an edge up so you do not knock one off.
2. **Match and drop.** Turn U until a daisy edge's side colour matches the centre below it, then turn that face twice (F2 / R2 / B2 / L2). Repeat for all 4.
3. **Next step up: direct cross.** Skip the daisy: build the white cross straight on the bottom, each edge matched to its centre as you place it. Fewer moves, closer to real CFOP.
4. **Check.** Flip to look at the bottom: a white plus, and each edge's side colour matches its centre.

2 · F2L

Pair each white corner with its edge in the top layer, then insert the pair. Four pairs. Cross stays on the bottom. From J Perm.

1. **Order.** Both pieces into the top layer, look where the white sticker faces, pair them, insert. Never break a slot you have already solved. Examples go into the front-right slot; the left side is the mirror.
2. **Finger rule.** Index finger on top, parallel to the white sticker: the two edges it touches are where the edge can go (together or apart).

Insert right, joined pair

Joined pair at the front-left of the top, white facing left; goes into the front-right slot

`R U' R'`

slot up · pair over · slot down

Insert left, joined pair

Joined pair at the front-right of the top, white facing right; goes into the front-left slot

`L' U L`

mirror of the right-hand insert

Insert right, split pair

Corner above the front-right slot, white facing right; edge at the back; top colours don't match

`R U R'`

slot up · corner over · slot down

Insert left, split pair

Corner above the front-left slot, white facing left; edge at the back; top colours don't match

`L' U' L`

mirror of the right-hand insert

Piece stuck in a slot

Corner in its slot, white facing front; edge on the right of the top

Lift it out with an insert move. Here that leaves a joined pair: U, insert.

`R U' R' · U · R U' R'`

White on the side, colours match

Corner over its slot, white facing front; edge at the back; top colours match

U' (white still showing). Match, so together: R away, U edge next to it, R' back. U2, insert.

`U' · R U R' · U2 · R U' R'`

White on the side, colours don't match

Corner over its slot, white facing right; edge on the left; top colours don't match

U (white still showing). No match, so apart: F' away, U edge to the far side, F back. U', insert.

`U · F' U F · U' · R U R'`

White facing up

Corner over its slot, white facing up; edge at the back

U until the edge matches its centre. R away (edge to the back), U2 corner on top of it, R' back. U, insert.

`U · R U2 R' · U · R U' R'`

Special case: split first

Corner over its slot, white facing up; edge next to it on the right

The white-up rule goes round in a circle. Split with R U2 R' (now apart), U', insert.

`R U2 R' · U' · R U R'`

3 · OLL step 1 · yellow cross

edges only; corners ignored (grey)

Dot (no yellow edges): do Minus, you get an L, then do L.

Minus

Line left to right

`F R U R' U' F'`

F · sexy · F'

L

L on the front and right

`f R U R' U' f'`

fat f · sexy · fat f'

4 · OLL step 2 · yellow corners

yellow cross already on top; only yellow shown

Plus (double headlight)

Headlights front and back

(R U2 R' U' R U' R') ×2

Antisune, then Antisune

or F (R U R' U')3 F'

Sune (fish) standard

Yellow corner front-left; yellow on the front face, right corner

R U R' U R U2 R'

take the front-right pair out, round, back in

Antisune (fish)

standard

Yellow corner back-right; yellow on the front face, left corner

R U2 R' U' R U' R'

out with U2, over, back in

Plus (headlight and blink)

Headlights on the left, blinker facing you
